

# Case Study

Flood Protection: **Halesowen, West Midlands**

Client: **PFR**

## The problem:

The road is located at the bottom of an estate where the water runs down to and the drainage is not sufficient for the volume of water.

The guys at M3 Floodtec have been fantastic from the word go, from the site survey and the tour of their facility where we were given a demonstration of the flood doors working in a flood situation, to the fitting of doors and flood barrier, they worked in a friendly and professional manner. All queries and questions were answered efficiently. We must also add that it didn't cost us a fortune, for us to have piece of mind that if it does happen again we will stay dry.

Jane & Darren Sattler, West Midlands

Flood Protection: **Halesowen, West Midlands**

Client: **PFR**

*Flood Defender door fitted on side access and Flood Defender double door fitted on rear of property.*

## The solution:

- 1) BSI Kitemarked Flood Defender Barrier fitted internally on rails
- 2) BSI Kitemarked Flood Defender Door to side access
- 3) BSI Kitemarked Flood Defender Double Door to rear of property
- 4) BSI Kitemarked Flood Defender Composite Door at entrance to property, matched to existing colour of Chartwell Green

Home owners were given full training as to ongoing care, maintenance and deployment of the products fitted.

*Client shown installing barrier for first time with guidance from on-site installation professionals.*
