

FLOOD DEFENDER RANGE

COMPOSITE DOOR

BROCHURE 2022/23

ABOUT

M3 Floodtec provide flood resilience for Infrastructure, Industrial, Commercial and Residential properties. We aim to protect all potential areas of water ingress both above and below ground. Operating throughout the UK and Globally from our base in Droitwich with a suite of registered designs and patent protected flood defence products that are independently tested and proven to be flood resistant. All our products are specifically designed to keep flood water out of properties and away from critical infrastructure.

Our Worcestershire head office is home to a BSI approved Research & Development testing facility that is available to flood resilience manufacturers to test their products to BSI BS 851188-1:2019 + A1:2021 standard.

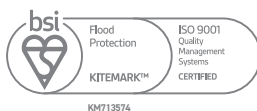

Our Composite Defender Door Range has been tested independently by BSI and is now Kitemark™ Certified to the new British Standard BS 851188-1:2019 + A1:2021 and is also available with a Low Threshold.

WHY CHOOSE THE FLOOD DEFENDER DOOR?

The advantage of the Composite Door range is its strength, flexibility and thermal efficiency. Whilst every door has been designed to provide superior flood protection, customers can personalise their finished look by combining door style, glass choice, side panels, door furniture and colour to suit their individual property.

All of our glass panels are triple glazed. External facing glass is clear. Internal facing glass is available in a clear, sanitised, Minster or Stippolyte finish. Sanitised glass designs are only available with a clear internal facing glass finish.

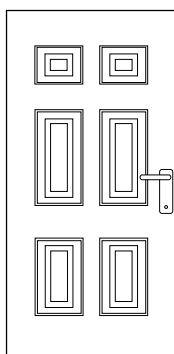

- Kitemark™ Certified to BS 851188-1:2019 + A1:2021
- Double rebate, high strength structure
- Superior quality seals
- A rated energy efficiency rating
- Triple glazing in a range of glass options
- Available in 11 woodgrain colour finishes

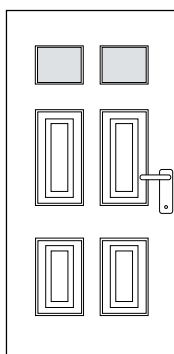

THE RANGE

We have a contemporary range of Composite Defender Door styles to suit your individual requirements.

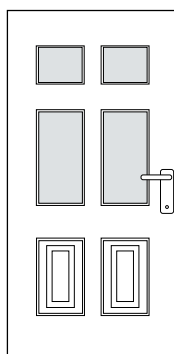

Please note: Maximum door only size - 997mm x 2181mm. Minimum door only size - 869mm x 1941mm

BRITISH STANDARD

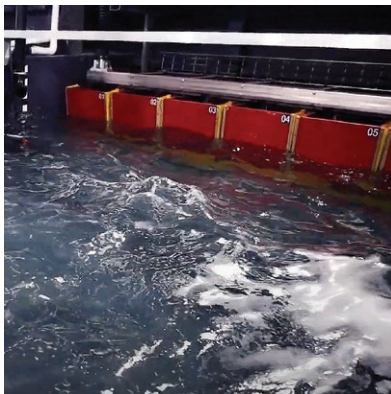

As a leader in our field, we are constantly pushing the boundaries of innovation to address the needs of an ever-changing environment. Fundamental to this programme of development is our ability to access state of the art testing facilities for both domestic and commercial flood resilience products.

The introduction of the new British Standard sets goals that suppliers must reach, and more customers are now insisting on BSI Kitemark™ Certified products. Our commitment to being able to supply certified products is absolute and backed by investment in a state-of-the-art test facility in Droitwich.

This facility can test product to the new standard as well as demonstrating to Clients what can be achieved in regard to property flood protection.

Our Composite Defender Door Range has been tested independently by BSI and is now Kitemark™ Certified to the new British Standard BS 851188-1:2019 + A1:2021.

Water shown against flood doors up to 400mm

The BSI independent testing is recognised as a standard that is uniform across the sector. It is also specified by the Environment Agency and many Local Authorities. With these endorsements, domestic customers are far more comfortable and trusting of our products and we have seen an increase in enquiries since obtaining the BSI Kitemark

Peter Marchant, CEO, M3 Floodtec

TESTIMONIALS

There is nothing more rewarding than receiving positive feedback from who matters most – our customer. We've helped over 1000 property owners, with a wide variety of solutions including listed buildings, senior citizens etc.

Please see a sample of our testimonials below:

M3 Floodtec are truly professional and passionate about their work and products whilst being open, honest and transparent and being empathetic and receptive to the customers requirements on all levels. It's not everyday that you encounter people with the morals and integrity of all at M3, who we cannot recommend highly enough, thank you.

Mr & Mrs Dolan, Worcestershire

Overall experience with M3 was brilliant from initial enquiry to installation. Despite some changes to specifications along the way from us M3 handled these efficiently, patiently and without fuss. M3 to be honest could not had been more accommodating or helpful.

Ross on Wye Sports Centre, Ross on Wye

The guys at M3 Floodtec have been fantastic from the word go, from the site survey and the tour of their facility where we were given a demonstration of the flood doors working in a flood situation, to the fitting of doors and flood barrier, they worked in a friendly and professional manner. All queries and questions were answered efficiently.

Jane & Darren Sattler, West Midlands

All work carried out as promised and to a very good standard. The fitters who came to do the work were great, very professional. I am most pleased with how everything was dealt with - Mr Smith.

Very efficient service with friendly staff who explained everything in easy to understand terms - Mr Gollard
