

Flood Defender UPVC Windows

Flood windows complement our range of flood doors for locations where flooding affects a property. Specially designed and fabricated to provide optimal sealing for reliable flood resilience.

Defender flood windows are a cost effective option that complement Flood doors in building entrance screens and lower ground floor windows. Flood windows can be 'custom made' to suit the specific property requirements.

Manufactured to match with Flood doors and kitemarked to BS 851188

- Permanently bonded into the frame
- Lightweight yet strong
- 30kg impact resistant
- Bespoke to suit each situation
- Choice of heights, up to maximum 2500mm and widths to 4500mm

- Fits any location where flood protection is needed but maintains through vision

Certification

BSI Kitemark licensed product (KM713574).
Passed the rigorous testing criteria of BS 851188-1:2019.

Technical Information

Defender Flood Windows can be manufactured completely bespoke - up to 2500mm heights and 4500mm widths.

Construction

The Defender Flood Windows can be manufactured in different thickness of glass up to 12.5mm laminated with 14mm spacer and 4 to 8mm inner glass – clear or planitherm.

Frames can be PVC, engineered hardwood or metal and coloured to suit individual requirements.

Maintenance

1. Ensure the glass is regularly cleaned with warm soapy water then dried
2. Visually inspect window beads every 3 months to make sure sealing is intact
3. **IMPORTANT: TAKE CARE NOT TO DAMAGE SEALING BEADS OR WINDOW RUBBERS**
